Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,3,4,21,and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Birch et al (US 3,949,751)

Regarding claims 1-4,21, and 27, Birch teaches an outlet portion (3) capable of use as a nasal sprayer, with an outlet end (4), a connection end (at 16), a nozzle shaped channel with a generally internal hourglass shape (7).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Birch as applied to claim 1 above, and further in view of Markus (US 5,843,043).

Regarding claims 5-7, Birch teaches an outlet sprayer portion as above, but fails to teach a receptacle with a piston for holding and expelling rinsing liquid. Markus discloses a nasal rinser which uses a receptacle (11) for storing rinsing fluid and a plunger (29) to expel the liquid coupled with outlet tip (13). It would have been obvious

Art Unit: 3767

to one of ordinary skill in the art at the time the invention was made to use the outlet of Birch with the dispenser of Markus in order to provide a means for dispensing a specific amount of treatment fluid (Col 2 line 54)

5. Claims 5,8,22, and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Birch as applied to claims 1 and 21 above, and further in view of Flagg (US 1,507,475).

Regarding claims 5,8,22, and 24, Birch teaches an outlet sprayer portion as above, but fails to teach a flexible exterior balloon shape for holding and expelling rinsing liquid. Flagg discloses a nasal rinser which uses a receptacle (2) for storing rinsing fluid and which is flexible to expel the liquid coupled with outlet tip (5). It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the outlet of Birch with the dispenser of Flagg in order to provide a means cleaning the inner walls of the nose without pushing the rinsing fluid past the lower portion of the nostrils (lines 55-60)

6. Claims 23, 25,26, and 28 rejected under 35 U.S.C. 103(a) as being unpatentable over Birch.

Birch teaches the invention as claimed except for using silicone rubber as the material of the outlet portion. It is considered to be within the ordinary skill of one trained in the art to use a certain known material on the basis of its suitability for the intended use.

Response to Arguments

7. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth R. MacNeill whose telephone number is (571)-272-9970. The examiner can normally be reached on 9:00-5:30 M-F.
